

Fireade

with Green Agent Technology™

Fireade Firefighting Agent:

FireAde is the most complete and user friendly firefighting agent produced in the world. Numerous firefighting agents claim to be Class A and B compliant; however they comply with NFPA 18/2006 wetting agent classification only. This classification is recognized within the fire service solely as a Class A agent. FireAde® complies with NFPA 18/2006 wetting agent and UL 162 foam liquid concentrate. This awards FireAde® a "TRUE" Class A and B classification approval. FireAde® eliminates all of the long-established issues of Class B foams; it will not clog, gum, or corrode foam systems and equipment. The global environmental impact system (EIS) for fire-fighting foams rates all foams on acute aquatic toxicity. FireAde® rates lower than the majority of Class A foams with the USDA forestry approval and declared fluorinefree foams. FireAde® offers the simplicity of using one product to extinguish multiple classifications of fire. This allows fire departments and fire brigades to increase their stocking supply by just using one product, FireAde®.

Physical Information

Flash Point/Range	No, Inflammability
Melting Point/Range	-1°C
Boiling Point/Range	127°C
Specific Gravity	1.011 g/ml
Appearance	Transparent, very light pale yellow
Odor	Faint Pleasant Odor
Flammability	Non-Flammable, this is used for firefighting
Plastic Safe	Yes
Propellant	Nitrogen

Shipping Information

Unit Weight	12oz.
Fill Weight	10oz.
Units per Case	9
Case Weight	9lbs.
Case Cube	0.22
Cases Per Layer	25
Cases Per Pallet	125
Pallet Weight (lbs)	1125
Dot Proper Shipping	Consumer Commodity, Aerosol

Regulatory Information

VOC%	Not Determined
VOC Category	Not Applicable
Compliant for CA	Yes

Fireade Aerosol
#8 32088 005116
10oz. /9 per case
